# *Acta* MATERIALIA

**Editor-in-Chief**
Professor Gareth Thomas

Professor Hirotaro Mori
*(Principal Editor: Characterization)*

Professor Subra Suresh
*(Principal Editor: Mechanical Properties)*

Professor Timothy Sands
*(Principal Editor: Physical Properties)*

Professor Richard Wagner
*(Principal Editor: Processing/ Phase Transformations)*

## AIMS AND SCOPE

***Acta Materialia*** and its companion journal ***Scripta Materialia*** are international Journals for the Science of Materials. ***Acta Materialia***'s purpose is to publish original papers and occasional critical reviews which advance the understanding of the properties of materials: metals and alloys, ceramics, high polymers and glasses. Emphasis is placed on those aspects of the science of materials that are concerned with the relationship between the structure of solids and their properties (mechanical, chemical, electrical, magnetic and optical); with the thermodynamics, kinetics and mechanisms of processes occurring within solids; with experiments and models which help in understanding the macroscopic properties of materials in terms of microscopic mechanisms; and with original work which advances the understanding of Engineering Materials.

Copyright © 1997 Acta Metallurgica Inc. All rights reserved.

This journal and the individual contributions contained in it are protected by the copyright of Acta Metallurgica Inc. who have licensed ESL to administer their copyright, and the following terms and conditions apply to their use:
Please contact ESL when seeking to use copyright material.

**Photocopying**
Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit classroom use.

In the U.S.A., users may clear permissions and make payment through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, U.S.A. [*Tel.* (508)750 8400; *Fax* (508)750 4744]. In the U.K., users may clear permissions and make payment through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 9HE, U.K. In other countries where a local copyright clearance centre exists, please contact it for information on required permissions and payments.

**Derivative Works**
Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

**Electronic Storage**
Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated.

*Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.*

**Notice**
*No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.*

*Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.*

*The Item-fee Code for this publication is:* 1359-6454/97 $17.00

ContentsDirect delivers the table of contents of this journal, by e-mail, approximately two to four weeks prior to each issue's publication. To subscribe to this free service, complete and return the form at the back of this issue or send an e-mail message to p.mestecky@elsevier.co.uk

♾™ The text paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

## EDITOR-IN-CHIEF

**Professor Gareth Thomas**

561 Evans Hall
University of California
Berkeley, CA 94720-1760
U.S.A.

Tel.: +1-510-643-0964
Fax: +1-510-643-0965
e-mail: garth@uclink2.berkeley.edu

## PRINCIPAL EDITORS

### *Characterization*

**Professor Hirotaro Mori**

Research Center for Ultra-High
Voltage Electron Microscopy
Osaka University
Yamadaoka, Suita
Osaka 565
Japan

Tel.: +81-6-879-7941
Fax: +81-6-879-7942
e-mail: a62217a@center.osaka-u.ac.jp

Deputy: Professor Akira Sakai

### *Mechanical Properties*

**Professor Subra Suresh**

Department of Materials Science
and Engineering
Massachusetts Institute of Technology
77 Massachusetts Avenue, Room 4-140
Cambridge, MA 02139-4307
U.S.A.

Tel.: +1-617-253-3320
Fax: +1-617-253-0868
e-mail: ssuresh@mit.edu

Deputy: Professor S. Mark Spearing

### *Physical Properties*

**Professor Timothy Sands**

Department of Materials Science
and Mineral Engineering
559 Evans Hall
University of California
Berkeley, CA 94720-1760
U.S.A.

Tel.: +1-510-642-2347
Fax: +1-510-643-0965
e-mail: acta@socrates.berkeley.edu

Deputy: Dr Kannan Krishnan

### *Processing/Phase Transformation*

**Professor Richard Wagner**

GKSS-Forschungzentrum
Geesthacht Gmbh
Institut für Werkstofforschung
Max-Planck-Strasse
21502 Geesthacht
Germany

Tel.: +49-415-287-2502
Fax: +49-415-287-2549
e-mail: richard.wagner@gkss.de

Deputy: Dr Fritz Appel

# CONTENTS OF VOLUME 45

## NUMBER 1

| | | |
|---|---|---|
| D. H. Bratland, Ø. Grong, H. Shercliff, O. R. Myhr and S. Tjøtta | 1 | Overview No. 124: Modelling of precipitation reactions in industrial processing |
| A. G. Evans | 23 | Overview No. 125: Design and life prediction issues for high-temperature engineering ceramics and their composites |
| B. Y. Zong and B. Derby | 41 | Creep behaviour of a SiC particulate reinforced Al-2618 metal matrix composite |
| F. Gärtner, A. F. Norman, A. L. Greer, A. Zambon, E. Ramous, K. Eckler and D. M. Herlach | 51 | Texture analysis of the development of microstructure in Cu–30 at.% Ni alloy droplets solidified at selected undercoolings |
| T. W. Shield, P. H. Leo and W. C. C. Grebner | 67 | Quasi-static extension of shape memory wires under constant load |
| P. Dang and M. Grujicic | 75 | The effect of crack-tip material evolution on fracture toughness—an atomistic simulation study of the Ti–V alloy system |
| A. Borbély, G. Hoffmann, E. Aernoudt and T. Ungár | 89 | Dislocation arrangement and residual long-range internal stresses in copper single crystals at large deformations |
| R. B. McLellan | 99 | The diffusion of heavy interstitial atoms in a particle density gradient |
| D. A. Hughes, Q. Liu, D. C. Chrzan and N. Hansen | 105 | Scaling of microstructural parameters: misorientations of deformation induced boundaries |
| J. Y. Huang, Y. D. Yu, Y. K. Wu, D. X. Li and H. Q. Ye | 113 | Microstructure and nanoscale composition analysis of the mechanical alloying of $Fe_XCu_{100-X}$ ($X=16$, 60) |
| J. Svoboda and P. Lukáš | 125 | Modelling of recovery controlled creep in nickel-base superalloy single crystals |
| P. L. Orsetti Rossi and C. M. Sellars | 137 | Quantitative metallography of recrystallization |
| S. Jiao, M. L. Jenkins and R. W. Davidge | 149 | Interfacial fracture energy-mechanical behaviour relationship in $Al_2O_3$/SiC and $Al_2O_3$/TiN nanocomposites |
| L. E. Murr, M. A. Meyers, C.-S. Niou, Y. J. Chen, S. Pappu and C. Kennedy | 157 | Shock-induced deformation twinning in tantalum |

| | | |
|---|---|---|
| J. B. Correia, H. A. Davies and C. M. Sellars | 177 | Strengthening in rapidly solidified age hardened Cu–Cr and Cu–Cr–Zr alloys |
| S. Tournier, M. Barth, D. M. Herlach and B. Vinet | 191 | Competitive formation of b.c.c.- and $\sigma$-phases in undercooled Co-V and Re-W melts |
| P. Grahle and E. Arzt | 201 | Microstructural development in dispersion strengthened NiAl produced by mechanical alloying and secondary recrystallization |
| R. Maldonado and E. Nembach | 213 | The formation of precipitate free zones and the growth of grain boundary carbides in the nickel-base superalloy NIMONIC PE16 |
| A. L. Sozinov, A. G. Balanyuk and V. G. Gavriljuk | 225 | C–C interaction in iron-base austenite and interpretation of Mössbauer spectra |
| D. Hull | 233 | The geometry of cracks and blisters in mica |
| R. Poduri and L.-Q. Chen | 245 | Computer simulation of the kinetics of order–disorder and phase separation during precipitation of $\delta'$ ($Al_3Li$) in Al–Li alloys |
| M. Dynna, A. Marty, B. Gilles and G. Patrat | 257 | On the nature of $L1_0$ ordering in equiatomic AuNi and AuCu thin films grown on Au(001) |
| P. Xiao, B. Derby, J. Webster and J. Penfold | 273 | The characterization of metal/ceramic interfaces using specular neutron reflection |
| J. Ruiz and M. Elices | 281 | Effect of water vapour pressure and frequency on fatigue behaviour in 7017–T651 aluminium alloy plate |
| J.-M. Yang, S. M. Jeng, K. Bain and R. A. Amato | 295 | Microstructure and mechanical behavior of in-situ directional solidified NiAl/Cr(Mo) eutectic composite |
| S. G. Warrier, B. S. Majumdar and D. B. Miracle | 309 | Determination of the interface failure mechanism during transverse loading of single fibre SiC/Ti-6Al-4V composites from torsion tests |
| K. L. Powell, J. A. Yeomans and P. A. Smith | 321 | A study of the erosive wear behaviour of continuous fibre reinforced ceramic matrix composites |
| S. Orimo, H. Fujii and K. Ikeda | 331 | Notable hydriding properties of a nanostructured composite material of the $Mg_2Ni$-H system synthesized by reactive mechanical grinding |
| D. E. Albert and G. T. Gray III | 343 | Mechanical and microstructural response of Ti-24Al-11Nb as a function of temperature and strain rate |
| B. P. Bewlay and M. F. X. Gigliotti | 357 | Dissolution rate measurements of TiN in Ti-6242 |

| | | |
|---|---|---|
| A. Mecif, B. Bacroix and P. Franciosi | 371 | Temperature and orientation dependent plasticity features of Cu and Al single crystals under axial compression—I. Lattice rotation effects and true hardening stages |
| M. S. Sandlin, K. J. Bowman and J. Root | 383 | Texture development in SiC-seeded AlN |
| A. Benghalem and D. G. Morris | 397 | Microstructure and strength of wire-drawn Cu-Ag filamentary composites |
| C.-W. Li and F. Reidinger | 407 | Microstructure and tensile creep mechanisms of an *in situ* reinforced silicon nitride |
| E. P. Barth, F. Spaepen, R. Bye and S. K. Das | 423 | Influence of processing on the ductile-to-brittle transition temperature of an Fe-B-Si metallic glass |

NUMBER 2

| | | |
|---|---|---|
| T. Mori, J. H. Huang and M. Taya | 429 | Overview No. 126: Stress relaxation by plastic flow, interfacial sliding and diffusion in an inclusion bearing material |
| K. Matsumoto, T. Shibayanagi and Y. Umakoshi | 439 | On the role of grain boundary character distribution in grain growth of Al–Mg alloys |
| D. Mandal and I. Baker | 453 | On the effect of fine second-phase particles on primary recrystallization as a function of strain |
| L. S. Pan and S. Horibe | 463 | Anelastic behaviour of zirconia ceramics under monotonic and cyclic loadings |
| D. Y. Li and L. Q. Chen | 471 | Selective variant growth of coherent $Ti_{11}Ni_{14}$ precipitate in a TiNi alloy under applied stresses |
| C. L. Fu and G. S. Painter | 481 | Point defects and the binding energies of boron near defect sites in $Ni_3Al$: A first-principles investigation |
| G. Dehm, M. Rühle, H. D. Conway and R. Raj | 489 | A microindentation method for estimating interfacial shear strength and its use in studying the influence of titanium transition layers on the interface strength of epitaxial copper films on sapphire |
| S. G. Song, J. I. Cole and S. M. Bruemmer | 501 | Formation of partial dislocations during intersection of glide dislocations with Frank loops in f.c.c. lattices |
| J. Zhang and A. T. Alpas | 513 | Transition between mild and severe wear in aluminum alloys |
| L. Kloc, S. Spigarelli, E. Cerri, E. Evangelista and T. G. Langdon | 529 | Creep behavior of an aluminum 2024 alloy produced by powder metallurgy |

| | | |
|---|---|---|
| Zs. Tôkei, J. Bernardini, P. Gas and D. L. Beke | 541 | Volume diffusion of iron in $Fe_3Al$: influence of ordering |
| A. K. Dahle and L. Arnberg | 547 | Development of strength in solidifying aluminium alloys |
| R. S. Mishra, T. R. Bieler and A. K. Mukherjee | 561 | Mechanism of high strain rate superplasticity in aluminum alloy composites |
| H. J. Wood, J. D. Hunt and P. V. Evans | 569 | Modelling the growth of feather crystals |
| A. Jacot and M. Rappaz | 575 | A two-dimensional diffusion model for the prediction of phase transformations: application to austenitization and homogenization of hypoeutectoid Fe-C steels |
| A. Thorvaldsen | 587 | The intercept method—1. Evaluation of grain shape |
| A. Thorvaldsen | 595 | The intercept method—2. Determination of spatial grain size |
| S. Banerjee, A. Arya and G. P. Das | 601 | Formation of an ordered intermetallic phase from a disordered solid solution—a study using first-principles calculations in Al-Li alloys |
| D. Fan and L.-Q. Chen | 611 | Computer simulation of grain growth using a continuum field model |
| J. Y. Uan, T. S. Lui and L. H. Chen | 623 | Plastic inhomogeneity and easy glide of aluminum and Al–$Al_3Ni$ eutectic alloy with [111] fiber texture |
| J. A. Hines and K. S. Vecchio | 635 | Recrystallization kinetics within adiabatic shear bands |
| A. Borgenstam and M. Hillert | 651 | Activation energy for isothermal martensite in ferrous alloys |
| R. Molins, G. Hochstetter, J. C. Chassaigne and E. Andrieu | 663 | Oxidation effects on the fatigue crack growth behaviour of alloy 718 at high temperature |
| F. Král, P. Schwander and G. Kostorz | 675 | Superdislocations and antiphase boundary energies in deformed $Fe_3Al$ single crystals with chromium |
| J. A. Shaw and S. Kyriakides | 683 | On the nucleation and propagation of phase transformation fronts in a NiTi alloy |
| S. R. Cain, J. R. Wilcox and R. Venkatraman | 701 | A diffusional model for transient liquid phase bonding |
| H.-J. Burmeister and R. Richter | 709 | Investigations on the origin of grain boundary cracks in fatigued f.c.c. metals |
| R. Richter and H.-J. Burmeister | 715 | Effects of grain boundary properties on intergranular cracking in fatigued f.c.c. metals |
| B. C. Goo and C. Lexcellent | 727 | Micromechanics-based modeling of two-way memory effect of a single crystalline shape-memory alloy |

| | | |
|---|---|---|
| J. M. Gregg and H. K. D. H. Bhadeshia | 739 | Solid-state nucleation of acicular ferrite on minerals added to molten steel |
| A. Mortensen | 749 | Kinetics of densification by solution-reprecipitation |
| Y. Wang and A. G. Khachaturyan | 759 | Three-dimensional field model and computer modeling of martensitic transformations |
| G. C. Davies and D. R. H. Jones | 775 | Creep of metal-type organic compounds—IV. Application to hot isostatic pressing |
| B. Marty, P. Moretto, P. Gergaud, J. L. Lebrun, K. Ostolaza and V. Ji | 791 | X-ray study on single crystal superalloy SRR99: Mismatch $\gamma/\gamma'$, mosaicity and internal stress |
| T. Kinoshita, S. Munekawa and S.-I. Tanaka | 801 | Effect of grain boundary segregation on high-temperature strength of hot-pressed silicon carbide |
| D. G. Morris and S. Gunther | 811 | Room and high temperature mechanical behaviour of a $Fe_3Al$-based alloy with $\alpha$–$\alpha''$ microstructure |
| Y. Mou and J. M. Howe | 823 | Diffusion fields associated with prolate spheroids in size and shape coarsening |
| T. Waitz and H. P. Karnthaler | 837 | The f.c.c. to h.c.p. martensitic phase transformation in CoNi studied by TEM and AFM methods |
| S. Kumar and R. N. Singh | 849 | Energy release rate and crack propagation in piezoelectric materials. Part I: Mechanical/electrical load |
| S. Kumar and R. N. Singh | 859 | Energy release rate and crack propagation in piezoelectric materials. Part II: Combined mechanical and electrical loads |
| P. C. McIntyre, C. J. Maggiore and M. Nastasi | 869 | Epitaxy of Pt thin films on (001) MgO—I. Interface energetics and misfit accommodation |
| P. C. McIntyre, C. J. Maggiore and M. Nastasi | 879 | Epitaxy of Pt thin films on (001) MgO—II. Orientation evolution from nucleation through coalescence |
| W. Hu, W. Wunderlich and G. Gottstein | 889 | Erratum to: Interfacial chemical stability during diffusion bonding of $Al_2O_3$-fibers with $Ni_3Al$ and NiAl matrices |

NUMBER 3

| | | |
|---|---|---|
| R. Torrecillas, G. Fantozzi, S. de Aza and J. S. Moya | 897 | Thermomechanical behaviour of mullite |
| S. Nemat-Nasser and J. B. Isaacs | 907 | Direct measurement of isothermal flow stress of metals at elevated temperatures and high strain rates with application to Ta and Ta–W alloys |

| | | |
|---|---|---|
| M. P. F. Sutcliffe and N. A. Fleck | 921 | Microbuckle propagation in fibre composites |
| W. P. Vellinga and J. Th. M. De Hosson | 933 | Atomic structure and orientation relations of interfaces between Ag and ZnO |
| S. W. Yoon, J. R. Soh, H. M. Lee and B.-J. Lee | 951 | Thermodynamics-aided alloy design and evaluation of Pb-free solder, Sn–Bi–In–Zn system |
| C. Mercer and W. O. Soboyejo | 961 | Effects of alloying on crack-tip deformation and shielding in gamma-based titanium aluminides |
| J. Warren, D. M. Elzey and H. N. G. Wadley | 973 | A fiber damage model for early stage consolidation of metal-coated fibers |
| P. Keblinski, S. R. Phillpot, D. Wolf and H. Gleiter | 987 | Amorphous structure of grain boundaries and grain junctions in nanocrystalline silicon by molecular-dynamics simulation |
| E. Cesari, V. A. Chernenko, V. V. Kokorin, J. Pons and C. Seguí | 999 | Internal friction associated with the structural phase transformations in Ni-Mn-Ga alloys |
| Mao Wen and Dongliang Lin | 1005 | Effect of elastic center on dislocation core structure in $Ni_3Al$ |
| A. Franco, S. G. Roberts and P. D. Warren | 1009 | Fracture toughness, surface flaw sizes and flaw densities in $Al_2O_3$ |
| Y. Sakai and H.-J. Schneider-Muntau | 1017 | Ultra-high strength, high conductivity Cu-Ag alloy wires |
| N. Lissart and J. Lamon | 1025 | Damage and failure in ceramic matrix minicomposites: experimental study and model |
| A. S. Booth and S. G. Roberts | 1045 | The brittle-ductile transition in $\gamma$-TiAl single crystals |
| G. Bao and H. Cai | 1055 | Delamination cracking in functionally graded coating/metal substrate systems |
| P. Hähner and M. Zaiser | 1067 | From mesoscopic heterogeneity of slip to macroscopic fluctuations of stress and strain |
| A. O. Mekhrabov, M. V. Akdeniz and M. M. Arer | 1077 | Atomic ordering characteristics of $Ni_3Al$ intermetallics with substitutional ternary additions |
| O. Paris, M. Fährmann, E. Fährmann, T. M. Pollock and P. Fratzl | 1085 | Early stages of precipitate rafting in a single crystal Ni–Al–Mo model alloy investigated by small-angle X-ray scattering and TEM |
| J. T. Wood, J. D. Embury and M. F. Ashby | 1099 | An approach to materials processing and selection for high-field magnet design |
| V. Beneš, M. Jiruše and M. Slámová | 1105 | Stereological unfolding of the trivariate size-shape-orientation distribution of spheroidal particles with application |

| | | |
|---|---|---|
| Danan Fan, Chengwei Geng and Long-Qing Chen | 1115 | Computer simulation of topological evolution in 2-D grain growth using a continuum diffuse-interface field model |
| K. Marthinsen and N. Ryum | 1127 | Transformation kinetics and microstructure for grain boundary nucleated recrystallization in two dimensions |
| D. Raabe | 1137 | Texture and microstructure evolution during cold rolling of a strip cast and of a hot rolled austenitic stainless steel |
| J. M. Rickman, W. S. Tong and K. Barmak | 1153 | Impact of heterogeneous boundary nucleation on transformation kinetics and microstructure |
| D. Z. Che, S. Spooner and J. J. Hoyt | 1167 | Experimental and theoretical investigation of the scaled structure function in Al–Li alloys |
| M. Sherif El-Eskandarany, K. Sumiyama and K. Suzuki | 1175 | Crystalline-to-amorphous phase transformation in mechanically alloyed $Fe_{50}W_{50}$ powders |
| A. Engström, J. E. Morral and J. Ågren | 1189 | Computer simulations of Ni–Cr–Al multiphase diffusion couples |
| J. Languillaume, G. Kapelski and B. Baudelet | 1201 | Cementite dissolution in heavily cold drawn pearlitic steel wires |
| V. Buscaglia, F. Caracciolo, C. Bottino, M. Leoni and P. Nanni | 1213 | Reaction diffusion in the $Y_2O_3$-$Fe_2O_3$ system |
